

WIDE RANGE OF INDUSTRIAL APPLICATIONS

Allied Moulded fiberglass enclosures can be found in a multitude of industrial applications all over the world. The rigid design of compression molded fiberglass together with its inherent corrosion resistance, provides a solution to a wide array of enclosure problems. The list below outlines some of the more popular industries and applications where Allied Moulded fiberglass enclosures can be found:

Waste Water Treatment

- Odor control
- Grinder pump controls
- Chemical injectors
- Sludge conditioners
- Desalination controls
- Wireless communications
- SCADA systems

Car Wash Industry

- Chlorinators
- Water recycling
- Air door controls
- Washing equipment
- Control panel systems

Pump Original Equipment Manufacturers

- Flow controls
- Flow metering
- Liquid level controls
- Equipment recorders

Utilities/Solar/Wind

- Gas detectors
- Coal analyzers
- Air pollution monitors
- Petrochemical analyzers
- Wireless communications
- SCADA systems
- Solar panel battery storage
- Solar DC combiner boxes
- Wind turbine control panel
- Data logging wind application

Mining

- Radio phones
- Elevator controls
- Air monitoring analyzers
- Emergency lights and sirens
